MARK INDUSTRIAL TOOLS WITH A LASER!

For marking and etching metals and permanently marking plastics, the low-cost, high-performance fiber laser systems from Epilog Laser have become the marking solution for companies around the world. You won’t find a more affordable piece of equipment for professional metal marking.

**Etch Barcodes, Logos & Serial Numbers:**
Place your part in the machine and press “print”. Etch your image on a single tool or on an entire jig of parts!

**No Dedicated Operator Necessary:**
With 24” x 12” (610 x 305 mm), 32” x 20” (812 x 508 mm), or 40” x 28” (1016 x 711 mm) engraving table choices, you can place an entire tray of parts in the laser system, reducing time spent at the machine.

**No Programming Required:** There is no need to learn proprietary software with the FiberMark. Setup the job in the Windows®-based design program your operators are comfortable with.
